Related subject: Woburn Sands (HE)

The existing settlement of Woburn Sands will be grouped with the 3000+ dwelling expansion planned to the West (between Now Brickhill and Woburn Sands). These revised boundaries make no provision for natural physical boundaries (lakes/ponds, railway and roads) to existing and future residents (and the new physical boundaries imposed by South East Milton Keynes housing development (roads, bridges and services) and East West Rail (level crossing and traffic issues), and the local services that residents currently access in HD. The new 3000+ dwellings in HE are due to have a local centre and schools, whereby existing Woburn Sands residents will be naturally pointed to those in HD and in Central Bedfordshire across the county line. The proposed grouping should anticipate the vast changes to the area and the difference in areas as this will hugely change how all residents access services. For example the Doctors is in HD and that is is a Bedfordshire/MK service. The physical community separation is significant and not reflected in the boundary changes.
