Related subject: Eamont Bridge / Penrith side of the River

The Village of Eamont Bridge is split in two. North side of the river is in the ward of Penrith South. Would it not make sence to make a minor change to the boundry line, take it back to the South side of the A66 from junction 40 down to the bridge at Brougham. Two reasons for this. First it will make the village more complete. Secondly it would help with issues around flooding that we have in Eamont Bridge,as one Parish would look after all the issues the Village has with flooding.
