**Related subject:** Macclesfield re warding

I was present when full council passed a decision to recommend a set of recommendations that proposed a very different recommendation for Macclesfield. The proposals in your consultation were those being offered by The Labour Group, which were voted down at both the boundary review committee and full council. I am concerned as to why this has occurred, it would seem to me that the system has been bypassed in some way or undue influence has been used. I would appreciate a response to my concerns as well as an explanation as to why this option was chosen over that approved by council.
