**Organisation Name:** (Member of the public)

## Comment text:

**Related subject:** Macclesfield

we purchased our house in a village because of the community interaction and support from local councillors who make themselves available every weekend as they live in our village, what you are doing is making bigger areas with limited access to councillors that don't live in our local community, this means they will have no understanding of what's happening in our village and how it affects the community  
The money that goes into east Cheshire council, and what we get in return is getting less and less, Our local councillors have become our friends, someone we can talk to when needed, you are destroying years of good work and representation they have given to the communities, it's just not fair
