Related subject: Moulsoe

As a resident of Moulsoe village who sees that the current MK East development is being extended into Eastern Strategic City Extension despite negative comments from the locals, I have to be positive about the potential move of Moulsoe parish into a ward with Broughton and Milton Keynes parishes. We have been neglected under current ward, which can be seen by how the MK East development is being approached, especially the state of roads. If being closer to Milton Keynes will benefit Moulsoe and grant access to all what it is missing it can be a positive change. However we residents want to have direct discussion with the council on the future developments around the village. The village needs a no through road, buffer zone all around it, connection to redways, additional parking for the residents closest to the MK East development, superfast broadband and so on. We want to be heard, please.
