**Related subject:** Rampton Ward East Bassetlaw boundary review deadline 29/424

I disagree with the new arrangement of getting rid of Rampton ward in its current state and including it into Tuxford .

Firstly,geographically,it doesn't make sense as all the other villages are going North to the Leverton ward , which if we have to be combined would look like a better option, in that the residents are all more rural , will have similar issues of which the councillors have a living breathing understanding of.

There are the specific needs of Rampton hospital and its community , as well as the closure of the power station issues all going forward.

Tuxford , although classed as rural, is a much bigger place with its own bespoke problems and needs , not least being next to the A1 and the massive traffic issues. I understand placing Stokeham with East Drayton and Laneham as they sit side by side but it looks like Stokeham is going into the Leverton ward.This also doesn't seem to make sense .

By dissolving the Rampton ward and removing the councillor , this will immediately dilute the attention it receives and as I understand there is not going to a reduction in councillors where is this person going to going , it doesn't seem fair ?

I know I choose to live rural but I already don't receive the services that are provided to a town despite paying council tax .

Please can you tell me how this will benefit me as a Rampton resident and include the disadvantages too.

Many Thanks
