Comment text:

With respect, I think the county lines ought to be put back to where they were before all the alterations took place in the first place. Stafford being our lead county town. Towns operated better and were controlled by a more efficient and straight forward council. Doing the new proposed line alterations with make the present situation even worse for individual towns.

Nothing good came of changing them in the first place, not when a town's post code belongs to another region, and under another council, but the same post code is for both.
