Related subject: Brislington

There are many things this city needs, a fully funded owned by the council bus network like Manchester and London, affordable homes in line with income not market value, etc it's not necessary to do this now, focus on what's important and use funds on what matters, our community pays high council tax but receives hardly any services, we need community centres, more buses, No cycle tracks unless you are tour de France fit, mono rails to clear congestion off bath road like other cities around the world, the boundaries are fine as they are.
