Related subject: South Walkley

I am submitting feedback regarding the Sheffield ward boundary review, specifically the Walkley ward.

My view is that the South Walkley area should remain within Walkley. The neighbourhood’s identity, daily movement patterns, and community connections are centred around Walkley’s core areas such as South Road and Howard Road. These are the places where residents shop, meet people, use services, and access transport.

Although the southern edge of Walkley borders Hillsborough and Upperthorpe, those areas function as distinct centres with different community patterns. Walkley is the area that reflects how this neighbourhood actually operates.

South Road forms a strong and logical boundary marker, and the surrounding streets fit cohesively within Walkley’s geography and community identity. Moving this area into another ward would not reflect how residents use the neighbourhood or how the community functions.

For these reasons, I believe South Walkley should remain part of Walkley ward.
